Lewistown, MT----Due to severe weather and travel conditions in central Montana, the Bureau of Land Management (BLM) has postponed all four of the public meetings scheduled this week to gather comments concerning the Draft Upper Missouri River Breaks National Monument Resource Management Plan (RMP).

Meetings had been planned this week in Lewistown, Winifred, Fort Benton and Havre.

All of these meetings have now been postponed.

The BLM feels these are important meetings and rescheduling them will allow better participation and give members of the public more time to review the Draft RMP.

The BLM will be rescheduling these meetings and details about dates and locations will be announced as quickly as they are finalized.
